

TWENTY-THIRD YEAR NO. 24

GLEICHEN, ALBERTA, WEDNESDAY, SEPTEMBER 5, 1929

SUBSCRIPTION \$2.00 PER YEAR

NEWS FROM MILO AND DISTRICT

At the recent election of delegates to the Wheat Pool Victor Bertrand was re-elected.

Mr. A. W. Will, who now lives at Victoria, Vancouver Island, has come up for the harvest. His son Peter now rents the farm. Mr. Will says Victoria is a fine place to live in.

Mr. and Mrs. Hugh Laughran announce that their daughter, Nettie will be married to Mr. William Eric Huskins on September 4th. The marriage will take place at the Laughran home in Majorville.

The combines made a tremendous hit out our way this year and conditions were ideal for straight combining, and while other years may not be quite so favorable it looks as though the combine has come to stay.

It now looks as if the entire harvest cutting, threshing and hauling to town, will be all finished by Sept 1st in most cases. The earliest finish up ever experienced in this district. The farmers will have a long rest and plenty of time to spend in California between now and spring providing they have the money.

The U. G. G. elevator at Milo, is being enlarged with a new addition. It seems a waste of good building material to enlarge any elevator this year at any point and from the looks of things the two pool elevators are the only busy ones. At first it was only intended to keep one Pool elevator open but the rush to it was so great that the second one had to be opened up too. Wheat on summer-fallow, not hauled, appears to run from 14 to 18 bushels and on stubble from 8 to 10 bushels per acre.

Many of our absentee landowners have returned for their annual visit and to gather up what is coming to them from the crop. This year the pickings are rather slim as they find that not only were we dried out but hauled out on top of that. Tony Beggs arrived the day of the hail storm and found that his farm was hauled again the second year in succession. Strange too, as during the previous twenty years he never had hail on his place. Mr. J. J. Aasgard came up from California to find his place hauled 30 per cent. Mrs. J. McCabe came up from Vancouver, where she now lives, also to find that her land had been hauled for the second year in succession.

FARMING UNDER SOCIALISM

(By John Glambeck)

In these days when we read so many conflicting reports in the daily press about conditions in Russia, about how the terrible Bolsheviks are trying to spread their infamous red propaganda, to other countries it is refreshing to read a letter published in the Canadian farm paper, The Furrow from a young American, born in the State of Washington, but who is now working on one of the large Soviet farms. The letter runs as follows: "Imagine 200,000 hectares (about 500,000 acres) in one almost square tract of land. Of this 170,000 acres were plowed last fall and 112,500 additional acres were seeded with winter wheat and rye.

"On this farm some 300 tractors are in use with 400 more on their way from America. Also the other farm machinery to do the harvesting and seeding. Railroads will be built every three kilometers and telephones to all the fields for the tractor units. There are 25 tractors to each unit.

"We have a big tent for a club. Radio, moving pictures and other entertainments are provided for the crews. A portable bathroom, kitchen and living quarters are provided. There is a field machine shop con-

nected with an electric station to do night repairing.

"The working day is eight hours. Sufficient men are employed for two and in rush seasons three shifts per day. Later on we plan to reduce the shift after we get the farm in full working order. All the workers on the farm have housing and everything else free, including a month's vacation each year with pay.

"These farms are the largest in the world. Next year 36 of them will be operating in European Russia and Siberia. They will reduce the cost of raising wheat below that of any other country.

"The farm I am working on is getting 200 new Ford cars for all the foremen, besides other cars and motor trucks. All this scarcely seems real in a part of the country where one could hardly see a single automobile two years ago, but today there are hundreds of them and more being made and imported every month.

"The government is operating a number of air mail and passenger lines. The fare is only one third higher than on first class trains, and accidents are very rare."

An eight hour day that may soon be reduced to seven, a month's vacation with pay and the various other good things for the workers, mentioned in this letter, should look good to the average American and Canadian farm worker, particularly those who have improved farm machinery and are now throwing them in the scrap heap. It is no wonder the employing class wants the propaganda stopped.

DEDICATION SERVICE BAPTIST CHURCH MILO, SEPT. 15

Dedication services of the Milo Baptist church will be held in the new church building at Milo on Sunday, September 15. Dr. J. Willard Jitch, D.D., will have charge of the dedication service at 11 p.m. and Dr. H. Bingham, B.A., D.D., of the First Baptist church, Calgary, will be the speaker at the evening service at 7.45. Following Dedication Sunday there will be special meetings held every night, except Saturday concluding on Sunday the 22nd. Dr. Bingham and Jitch will be the speakers. Everyone is heartily invited to attend these meetings.

More than one-fourth of the farms that advertised by radio last year have quit the air, being convinced that this form of advertising is practically worthless because it annoys the fans who buy radio sets for the entertainment afforded.

It is estimated that Japan's population is increasing at the rate of 1,500,000 a year.

New Yorkers spend 75 tons of pennies every day for newspapers.

Watch The Fire Brigade

At a meeting of the chief and heads of departments of the Gleichen Fire Brigade held Tuesday night it was arranged that there be a fire practice during the latter part of next week, the week ending September 14.

Prizes will be given to members of the department that is most proficient at practice.

The actual time and the location of the practice will be kept secret. When the whistle blows the fire chief will be at the fire hall and will then give full directions.

The judges will be Chief Jack Lester, Assistant Chief Dan McDonald, Pres. L. Michael and W. F. Ferguson.

This is the first of a series of practices which should create keen competition and develop higher proficiency in each department of the brigade.

The prizes are supplied from Brigade funds. Let everybody be on the watch and give the boys every co-operation.

HOOT GIBSON IN NEW FILM

"Smilin' Guns" Coming to The Colony

Surrounded by an excellent cast and with a story ideally suited to him, Hoot Gibson, Universal's irrepressible cowboy-romance will appear on Saturday night in "Smilin' Guns," at the Gleichen Community Hall.

The picture, in which the lovable Hoot portrays a reckless and devil-may-care cowboy who suddenly decides to become a polished gentleman, is a typical Hoot Gibson production, replete with hilarity, drama and action.

The story of "Smilin' Guns" is a screen adaptation from a popular magazine story by Shannon Ffe, prepared for the silver sheet by George Morgan, widely known screen writer.

Heading a well chosen supporting cast is Blanch Mehaffy, the beautiful and talented young actress portraying the role of a society girl with whom the dashing Hoot is enamored. Miss Mehaffy's beauty and histrionic ability go far toward making "Smilin' Guns" a splendid picture.

The heavy role is entrusted to Leo White, a suave and sophisticated villain. White, as well as being one of cinemaland's most heartless blackguards, is also a comedian of parts and many screamingly funny scenes in "Smilin' Guns" come as a result of his marvelous comedy sense.

McMANN-BROWN

On Saturday, August 31st a wedding of much interest took place at Swansea House, Gleichen when Miss Ida Mae Vivian Brown was united in marriage to Mr. Murel Franklin McMann, of Carbon. Promptly at one o'clock the bride beautifully attired in a light rose beige georgette frock and carrying a large bouquet of pink and white butterfly roses with long white streamers, entered the drawing room attended by her mother who gave her in marriage and by Miss Sara Cook, her bridesmaid, who wore a pretty brown frock and carried pink sweet peas with pink streamers, to strains of Lohengrin's Wedding March played by Miss Audry Young, of Calgary. At one end of the room a nook had been formed by flowers where they were met by the bridegroom and his attendant, Mr. Neil W. McMillan, and where the ceremony took place, conducted by Rev. F. M. R. Gibney, who later gave a fine address to the young couple. During the signing of the register Miss Young played "Love's Greeting". After a dainty luncheon served by friends of the bride to about eighty guests Mr. and Mrs. McMann left by car for points west, the bride travelling in brown and tan.

The rooms were beautifully decorated in garden flowers. The bride's table being adorned with tall pink and mauve candles and sun shade of sweet peas centred by the large three-tier

wedding cake. The numerous and beautiful gifts showed the esteem in which the young couple were held. There were many out of town guests.

THE CANADIAN BIBLE SOCIETY

The annual service and meeting of the Gleichen branch of the Bible Society will be held in the United Church on Sunday evening at 7:30 o'clock. The secretary for the South Alberta Auxiliary, the Rev. H. D. Marr, B. A., will be the speaker. It is earnestly hoped that the usual united service will be heartily participated in as in previous years. A cordial welcome is extended to all.

F. M. ROSS GIBNEY, Secy.-Treas. of the Gleichen Branch.

SCHOOL OPENED TUESDAY MORNING

The Gleichen public school opened Tuesday morning for the term with a good attendance of pupils. Quite a number of new scholars are enrolled from the surrounding district. The new staff is comprised as follows:

Principal, J. F. Gorrill, Grades 9-10-11.

Vice-Principal, Miss Agnes Melrose, Grades 7-8.

Miss Margaret Van Volkenburg, Grades 5-6.

Miss Mildred McDonald, Grades 3-4.

Miss Annie Kent, Grades 1-2.

Here and There

(342)
An Indian grave, discovered by accident by Canadian Pacific employees at work near Brooks, Alberta, last May, is considered by experts to be between 300 and 400 years old. It is thought the grave was originally above ground but the passage of centuries had buried the grave below the soil. An irrigation ditch was being constructed when the grave was discovered.

Tri-motored airplanes are being launched in one of the most spectacular fights in the history of aviation. War has been declared by the Canadian Government on the spruce bud worm and the airplane is to be the principal arm of the service. Planes each carry 1,600 pounds of powder, and will dust it while flying low, over the tree tops.

The blueberry industry is showing much improvement in Yarmouth and Shelburne counties, Nova Scotia. Last year there were only 4,000 acres of crown land burned for blueberry growing; this year 10,000 acres have been burned. Value of crop last year was \$65,000 and it is estimated that the crop's value could be increased to half a million dollars.

The province of Alberta has adopted Old Age Pensions, the funds for which are provided by co-operation between the federal and provincial governments. The scheme has now been adopted by all Canadian provinces from the Quebec boundary westward.

About 35 tons of coins are handled each day by the Federal Reserve Bank of New York.

One kind of bark beetle alone destroys \$15,000,000 worth of timber every year.

The Pyramids of the Prairies

The Pyramids of Egypt were built for the glory of ruling dynasties by toiling myriads of slaves and with wealth wrung from needy tax-paying citizens. Generation after generation of desperate toil with primitive tools built these gigantic monuments, the pride of the ruling class.

The Wheat Pool farmers of Western Canada are building an infinitely more servicable monument—a great system of elevators owned by themselves and operated for their protection and benefit. By means of an annual contribution of two cents for each bushel of wheat the Pool members of Alberta have provided over six million dollars for the construction of their elevator utilities. Bound together by the ties of co-operation, these Pool farmers are working out a plan for their own economic freedom.

The clear-sighted, far-seeing Pool member is extremely loyal to his own elevator system, realizing its value. Not only are Pool elevators operated for the Pool membership at bare cost, but they provide a strong shield to guard the welfare of the producer.

THE WHEAT POOL EXPECTS EVERY POOL FARMER TO DO HIS DUTY

WHEREVER POSSIBLE

Patronize Pool Elevators

In Turkey bachelors 25 to 40 years old, spinsters between 20 and 35, and widowers and widows without children must pay a special tax. Love makes the world go round, besides turning a good many heads. In the race of life, common-sense has the right-of-way.

Rt. Hon. L. C. M. S. Amery, secretary for the Dominions in the late Baldwin Administration, who arrived in Canada recently on the Empress of Australia, had as his objective in this country the climbing of the 11,000-foot Mount Amery, named after him, in the Canadian Rockies. There is no official record of this mountain ever having been climbed before this attempt which was undertaken with the famous Swiss guide Edward Feus. Colonel Amery at once took the 2500-mile trip across Canada to Lake Louise whence in company of Feus and A. O. Wheeler, honorary president of the Alpine Club of Canada, he set out for the peak located near the Great Columbia Icefields near the junction of the Alexandra and Saskatchewan Rivers. Lay-Out shows (1) the vast rampart of Mount Amery with the great icefield below (2) Edward Feus Swiss guide, all set for the ascent and (3) A. O. Wheeler (left) and Rt. Hon. L. C. M. S. Amery, chatting outside the Banff Springs Hotel just prior to setting out north with a pack train to locate and climb the peak.

THAT'S HOOT GIBSON

A WILD-RIDING COWBOY IN HIGH SOCIETY

IN SMILIN' GUNS

Saturday, Night GLEICHEN COMMUNITY HALL

Two guns in his belt—and a handkerchief in his sleeve! A mighty wallop in his fists—and a teacup on his knee! A smile of joy for the girl he loved—and a snarl of hate for the villain and his kidnapping wolf-pack! Dainty dancing for the ladies—and the wildest riding you ever saw for the men who tried to outwit him—

WORLD HAPPENINGS BRIEFLY TOLD

Canada was the principal country with which the United States traded in June, leading all the other countries in both exports and imports.

Eric Remick, author of "All Quiet on the Western Front," may be the recipient of the Nobel prize for literature. It was reported from Stockholm.

The British Columbia Government recently announced the distribution of liquor profits amounting to \$652,195.45 covering the six-month period ended March 31.

The first reproduction of the small group in western Canada was left at St. Mary's, when the John Gooding Thresher Company reduced its operating staff by one-third.

Hon. Aulley Morrison, Chief Justice of British Columbia, was among the guests who received the degree of doctor of laws at the convocation exercises at Dalhousie University, on August 26.

Closer co-operation in air transport matters throughout the world began between Great Britain and France, was discussed at a meeting of Lord Thomson, Secretary of State for Air, and Mr. Raymond, respective Ministers for Air.

Mrs. K. Bloomfield, 34, of the first woman in the state of Victoria, Australia, to gain an air pilot's license. She has passed her final tests—there were no accidents on that—while flying clouds.

The Graf Zeppelin's flight from Friedrichshafen brought forth a \$200,000,000 prize for regular German-Japanese air service with terminals at each of the four countries. It was announced that for the scheme of the Graf Zeppelin, the prize was \$200,000,000.

Sir Frederick Williams-Taylor, of Montreal, general manager of the Bank of Montreal, has been named to assume the position of vice-president of the bank. H. D. MacKenzie, formerly assistant general manager, succeeds Sir Frederick as general manager.

Big Jambores Over

Many Tribes Made Out Gathering Of Boy Scouts

Tens of thousands of boys trekked out of Arrows Park, England, when camp was broken and the great world jambores of Boy Scouts came to an end. Fifty thousand boys left for their homes in nearly fifty different countries.

The previous night was passed largely in leaving-taking as big contingents of boys toured the camp and bade their comrades farewell. At dawn they began passing through the park on their homeward journey to far countries of the earth. They took with them the farewell message from the chief scout who had led them the camp, the keynote of which was "From now on, the scout symbol of peace is a golden arrow."

The total number of visitors was 124,422. The next jambores will be held in 1933. The place will be determined at a conference to be held at Salzburg, Austria.

Development Of Peace River

Country Has Gone Ahead Rapidly In Last Few Years

The first shipment of grain out of the Peace River District, was made up of three cars of wheat hauled by team 80 miles from Vauxhall to Reno. There were no highways or telephones, and only two small rural schools there. Today, there are 1,000,000 acres under cultivation, with a population of 12,000. There are schools, churches, flourishing businesses, electric light plants, highways and telephones.

The farmer may hatch his chicken by electricity, raise them using electric light instead of sunlight, and finally fry them for the table by the use of an electric range.

Church At Jasper Is Soldier's Monument

Gift of Unique Lady in Memory Of Her Son

Unique among the churches of Canada is the little church of St. Mary and St. George, of Jasper, which was consecrated recently by the Bishop of Edmonton. The building, a beautiful structure of stone and alder, with a tiled roof, was built at a cost of \$10,000 from a design by A. H. Calderon, of Edmonton, and is a gift to the parish from a lady in England, who wishes her son to remain anonymous.

It was presented in memory of her son who was killed in war, and he had the corner stone, which was laid last year by His Excellency The Governor-General, his testament which was found on the young man's body when he was carried out of "No Man's Land." The furnishings and fittings of the church were also the gift of the unknown donor, while the bell was presented by Viscount Wellington.

May Kill His Art

Insulin Who Makes Pictures In Human Hair Requires Heated Pushion

G. Derichow, the Russian artist who has received a certain amount of fame for his pictures in human hair, fears that the bobbed hair fashion may kill his art. He is a piece of silk or linen cloth, and his brush a fine knitting needle. His method of weaving the hair into the cloth, he said, is similar to that used in making the famous Gobelins tapestries. Derichow started producing his pictures at 10 years of age when apprenticed to a hairdresser, and while a war prisoner in Germany he spent his leisure in practice.

Recipes For This Week

(By Betty Barclay)

CHIFFON PIE

- 1 cup sugar.
 - 1/2 cup butter.
 - 1 cup boiling water.
 - 1/2 cup lemon juice.
 - 1/2 cup lemon rind of 1 orange.
 - 1 egg.
- Mix sugar, flour and salt; add boiling water, stirring constantly. Cook five minutes. Add well-beaten egg yolks, rind and juice of fruit and cook until thick. Cool. Make meringue in top of bowl. Add well-beaten egg whites, powdered sugar and 1 teaspoon lemon juice. Whip one-fourth of meringue into custard mixture. Turn into baked pie shell. Cover with meringue and remaining meringue and brown in moderate oven.

GREEN TOMATO PRESERVE

- 1 pound sugar.
- 1 pound green tomatoes.
- 1/2 cup lemon juice.
- 1 tablespoon preserved ginger.

The above table merely gives the general proportions. Most women will need to prepare several times this amount at a time. Wash the tomatoes, remove any stem spots about the stems, and weigh. Cover with boiling water, let stand five minutes, drain and slice into a preserving kettle, placing a layer of tomatoes, one of sliced lemon, then the sugar with the ginger sprinkled over it. Let the mixture stand overnight. Drain and boil the syrup for ten minutes. Add the tomatoes and cook rapidly until they are clear. Pour into clean, hot jars and seal.

A Long Phone Call

Woman In London Speaks To Hospital In Sydney, Australia

A conversation between a Hampden widow and the matron of a Sydney, Australia, hospital, marked the first time that a private long distance line has bridged the 13,000 miles between London and Sydney.

Jack Dickson, a Sydney resident, was calling for his mother in London and, although radio telephone connections between the two cities are not yet complete, the mental stage, the post office department made arrangements so that Mrs. C. G. Sigurd was able to speak to the hospital matron for 10 minutes and learn that her son was improving.

How To Order Patterns

Address: Winnipeg Newspaper Union, 120 McLeod Ave., Winnipeg

Pattern No. _____ Size _____

Name _____

Town _____

Patterns are regularly painted red because of iron plates which are cheap and durable, can be obtained in red color only.

AN OUTSTANDING EXHIBIT

The four-year-old next in line at Strathmore

revenue returned more than \$475,000 per cow above feed costs.

The milk cans in the picture were used to illustrate the amount of milk produced in one year by Strathmore. About one-sixth of the cans are visible in this picture. Altogether there were 478 cans—representing a production of 2,897 gallons of milk.

This exhibit attracted a constant stream of visitors who spent a good deal of time studying the material presented on a large scale. There were approximately 600 people here in the famous herd at Strathmore, Alberta. The show herd of 15 head won 41 first prizes at eight major exhibitions in 1928. Under the advanced registry system of the Holstein-Friesian Association of Canada, there are 40 Gold Medals and 73 Excellent cows in this herd. This is the largest number of Gold Medals in any herd in the world.

Some very distinguished visitors happened to come along just as this photograph was about to be taken. The two ladies are Dorothea Lady Strathmore and her daughter, Hon. Miss Strathmore. The gentlemen are Lord Pentland and, on the left, George H. Jones, manager of the Strathmore Farm.

Yankovic Whitecap Was Last Survivor Of Original Band Of 300 Sioux Indians who came to Canada from the west coast of the United States in 1882.

Chief Yankovic Whitecap, died in the 70th year. As the custom with the Sioux, he was buried the same afternoon with his crown of eagle feathers. His pipe, his bow and many other personal belongings were buried with him.

The last that came north in 1862 was led by Chief Whitecap, Yankovic's son.

Young Indians on the reserve, particularly will miss this last link with the old days of their Indian forefathers.

Chief Yankovic Whitecap will also be missed at the Saskatoon exhibition, where every year he was a colorful figure with his followers, the Whitecap Band, in front of the reserve in the entertainment in 1928 of the grand stand.

The old chief was noted as an energetic worker. Many are the industrial buildings on the reserve built under his direction.

He was also an apostle of thrift, putting up his own hay and encouraging the eagle feathers, he has headed it was in this task this year when he was overcome by his illness two weeks before his death.

Chief Yankovic Whitecap will long be remembered by his people, who knew him as a wise and good leader.

Snow Shows A Myth

Few Eskimos Have Ever Seen Or Heard Of It

Eskimos are frequently seen in the Arctic Circle in the winter. They live in igloos, and are often wintered. Quite wrong Mr. Stefansson, who has explored the Arctic, is telling a Cambridge audience. The wild, flowers of the Arctic are equaled, and the Eskimos are not as cold as ever seen a snow-house or heard of one except at school!

Inside Information

Science has perfected a tiny camera that can be lowered into the human stomach to take sixteen pictures of the intestine dependent from all angles. This is getting an inside view of the situation. Afterward the pictures may be enlarged.

A new Japanese rubbing machine might work for women and young girls in cotton factories and other industries.

A Fascinating Subject

Aviation Editor Of New York Paper, Predicts Wonderful Future For Air Travel

Among the aviation enthusiasts who set no bounds to their confidence in its coming developments is Bruce Gordon, aviation editor of the New York Evening Post, who has just written a book with the title "Flying Kicking." Before the war, he was a half-century, he believed, the world will have entered the air age and the workmen flying to their work "as now they motor."

Gigantic flying machines carrying thousands of passengers will then cross the Atlantic so fast that the passenger will be unconscious of their speed. It is a fact that he can go to sleep on smaller aircraft, or perhaps an automobile capable of landing him on the roof of his apartment or in front of his door will be used to complete his journey.

The future of aviation is, indeed, a fascinating matter. Yet it is qualified to forecast with any real basis of knowledge on a large scale. "is good tea"
RED ROSE ORANGE PEKOE is extra good
In the best package—Clean, bright aluminum

The Singing Fool

By HUBERT DAIL
Copyright, 1924, Warner Bros.
Picture, Inc.

SYNOPSIS

Al Stone, the singing waiter at Hickley Joe's New York night club, has written a love song to Molly Winton, but she treats him as a fool. He is really a very clever man. Finally he goes to the floor and renders the ballad himself, hoping to touch her heart. Molly, the famous Broadway producer, is in the audience and offers to buy the song. Molly makes up to Al, so the latter insists that Marvin hire Molly to sing the number in one of his revues. Marvin agrees. Al, the little cigarette girl, is heart-broken when she finds Al is leaving, for he is deeply in love with him. Al and Molly marry and both enjoy successes on Broadway. Once Al visits his old friends at Hickley Joe's and is delighted to see him. Then he returns to Molly's apartment and finds her very theatre. She is with his friend, John Perry. Al does not know that she surreptitiously sends Molly hands as all three leave together.

CHAPTER I.

They descended the elevator from the Manhattan Hotel Theatre to the street, where Al looked around for a taxi. John Perry, following him, took Molly arm, guiding her through the dense after-theatre crowds toward the curb.

Broadway was at its best—two wide currents of human beings moved compactly up and down the sidewalks, the brilliant canopy of lights from electric signs, the shimmering beams in the crowds, and power, and feeling of dreams carried from the theatres that dotted the Street of Lights. There were shrieks for taxis, the giggle of girls looking on the arms of their escorts, the piercing whistle of the traffic cops stopping and starting the moving line of motor cars as the lights went from green to red, and back again. A happy, carefree spirit distinguished the crowd. But Molly turned bored eyes on this fantastic display of modern civilization, and she waited impatiently for the taxi.

"Why doesn't Al hurry and get one?" she inquired impatiently of John Perry.

"Steady, sister. He's doing the best he can," answered Perry. But now a taxi driver saw Al beckoning hand and swung up to the curb. They piled inside and the driver sped away toward the palatial skyscraper apartment in the city where Al and Molly lived. Molly snuggled down between the two men.

"Al," she remarked after a moment, "why do we always have to travel in taxis? Why can't we have a limousine and a chauffeur of our own? Everybody else has one."

"Al did not notice the complaining note in her voice. 'I've been thinking that many times and I'm sure it's early now. Tomorrow you can pick one out. What kind?'"

"I was thinking of a Rolls-Royce," said Molly eagerly.

Al looked at her and gave a little laugh.

Had Diarrhoea Bowels So Active Feared For His Life

Mr. R. J. Jago, Canby, Minn., writes:—My little boy, when three years old, had a severe case of diarrhoea. The bowels were so active, he was so restless, and so afraid for his life, I tried many remedies, but he was getting worse. A friend told me of

an advertisement for an improvement. I got a bottle and gave him a few drops. He was relieved.

I have used it for the other children of my family, and it has given me great relief. I have used it for the other children of my family, and it has given me great relief. I have used it for the other children of my family, and it has given me great relief.

and when he gets a little better, I will give him a bottle. I will give him a bottle. I will give him a bottle. I will give him a bottle. I will give him a bottle.

Dr. W. B. Williams & Co., Baltimore, Md.

by, anyway. He knows what an attraction your agent."

Al paused to regard Molly with a reassuring smile, but she did not see it. Her eyes were fixed somberly upon him.

A helpless look passed across Al's face.

"As for my being selfish," he said humbly, "well, perhaps I am. But I don't mean to be. I simply adore you, Molly, and it would give me the greatest happiness I can think of for us to have a child. It would make all we've achieved seem worth while."

Molly rose wearily. "I'm going to bed."

Without kissing Al good night or even looking at him, she walked slowly toward her bedroom, her head bowed down. He heard her bedroom door slam sharply.

Instead of going to his own room and undressing, Al lay in a captive and paced the floor. At first he was agitated and worried about Molly. But gradually he argued himself out of the disturbed state of mind. After all, it was natural that she should be so upset. Perhaps the strain of his nightly performances was too much for her. In the morning this cloud

of worry would pass from her. He finished his cigarette, put out the light and went to the window, whence he could look out on the yellow glow from the city lights.

As he stood by the window, dreaming, meditating, already planning the future of the child, he began to long to him, he heard the tinkle of a piano. He turned and saw that he must have opened it. He heard Molly's faint voice.

"Before Molly hung up Al thought he caught the word 'John.' But no, he must have been mistaken. John Perry wouldn't be calling up at this hour.

(To Be Continued.)

Broadcast Sensations Of Parachute Jump

Man Started To Talk At Height Of 10,000 Feet

The sensations experienced by a parachute jumper were broadcast from Roosevelt Field, New York, by H. G. Bushmeyer, while he was plunging to earth from a height of 10,000 feet. It was believed to be the first experiment of its kind.

Bushmeyer, 21-year-old, was transmitting radio signals from the plane and held the microphone in his hand. When he stepped out of the plane, he started to talk into the "mike" and the words were picked up by the field by a short wave set, transmitted to the New York studio of the National Broadcasting company.

Then he sent out a network of stations.

Seeding By Airplane

California Rice Farmers Find Experiment Was Highly Successful

By using airplanes to seed their crops, California rice farmers may have thousands of dollars. Three principal advantages are outlined as the result of a successful experiment made on a 400-acre tract of Merced, owned by the Crocker-Huffman Land and Water Company. Five hundred pounds of seed was loaded into the front cockpit of a plane, constructed as a bin with spouts, and made 180 round trips, seeding the field.

The seed was picked up by the field in three days. The owners expressed high satisfaction.

Ready In November

Advice has been received that the Federal Government has awarded the contract for the new plant for the production of registered Grover's Association to the Carter-Hall-Adinger Construction company of Mechanicsville and Winnipeg. The building will cost \$250,000, and will stand 365 feet high. It will be erected on property owned by the City of Moose Jaw. The building will be of reinforced concrete construction and it will be available for use not later than November 20.

According to latest calculations, the circumference of the universe is only 16,000,000 light years, which is the most one-hundredth the size previously supposed.

Making Electrical World

German Aviator Circles World On 230 Gallons Of Gasoline

Around the world on 230 gallons of gasoline! Whether that is a record, Baron Koening Wertheim, the youthful German aviator who reached the Pacific coast from China certainly knows a few things about economic air travel.

He is voyaging around the world in a small two-cylinder monoplane of German make.

He landed at San Francisco preparatory to flying across the United States on his aerial jaunt and flew to Los Angeles using gasoline and oil worth \$1.80.

The little engine pulls a motorcycle motor and the plane sails at 75 miles an hour through the air.

Baron Koening started his world tour by flying 3,800 miles non-stop from German capital to Moscow, and won a \$10,000 prize the outstanding German aviator. Then he decided to go on, and will have flown 16,000 miles by the time he reaches the Fatherland again in September.

His flight is an object lesson to the world when it comes to saving fuel. Baron Koening has not flown over water. He has made the trip in a sport 17 hours and the world has taken a year to it.

His trail led him from Berlin to Singapore, the point farthest distant, then across the Pacific to California. He stopped at Duxon as his first point outside California. From there he flew to San Francisco, where he embarked again for Europe.

The youthful hero flies the plane (any design) of his regime. He pulls the plane 50 miles on one gallon of fuel and the oil consumption is negligible.

When ready to hop off for another point he warms the engine, throws two switches and his plane sails into the air and he is on his way.

Baron Koening's trip is a record. When he started the world tour. That experience he got during a college vacation nine years ago. Then he was in the army.

Plan Nation Wide Broadcasts

Canadian National Railways Have Ambitious Program Map

"That the next two months will see the greatest advance in broadcasting in Canada that has ever taken place since the commencement of the war is a foregone conclusion," says W. D. Robb, vice-president of the Canadian National Railways, who department radio is included.

"Two major factors will bring this about," continued Mr. Robb, "one is the expansion of regular weekly schedule of national broadcasting on a national scale, and a marked improvement in programmes generally, and especially by providing more opportunity for Canadian content in the programmes from their own country."

"It is only one step from the Canadian National Railways, but as the nation's greatest broadcaster, now operating thirteen stations and operating the only system of wires adapted for broadcasting under one direction stretching from Coast to Coast, we are planning to institute marked improvements and to co-operate in every way possible to assist other broadcasters in doing similar work."

Canadian National Railways are planning to extend our National network three times weekly from the Rockies to the Rocky Mountains and once or twice from Atlantic to Pacific.

These regular weekly national broadcasts should go far to create a sense of unity and to bring the provinces, under more closely the elements and interests within our country and to remove the feeling of isolation felt in a few communities.

"The regular weekly national broadcasts should go far to create a sense of unity and to bring the provinces, under more closely the elements and interests within our country and to remove the feeling of isolation felt in a few communities."

"The regular weekly national broadcasts should go far to create a sense of unity and to bring the provinces, under more closely the elements and interests within our country and to remove the feeling of isolation felt in a few communities."

"The regular weekly national broadcasts should go far to create a sense of unity and to bring the provinces, under more closely the elements and interests within our country and to remove the feeling of isolation felt in a few communities."

Little Helps For This Week

Price Of Eveready Is Estimated At \$150.00

Probably the most valuable flower show in the world was recently on display at the Chelsea Flower Show, London, England. A single flower sprang from one of the seeds sold for more than \$1,000, and others sold for \$1,000. It is estimated that the entire pod will be worth \$100,000. The pod is the fertilization of a rare orchid, the Miltona Astrangi.

A commercial fertilizer plant to cost \$7,000,000 is to be built at British Columbia.

Higher collection in Canada is carried on in 23 universities and 85 colleges.

Town & District Furniture Sale

Watch for the Fire Brigade prac-
tice.
Sept. 10—Lyon Estate auction
sale.
Who will win the Fire Brigade
prizes?

The new Pioneer elevator contin-
ues to grow skyward.

Special attention is called to the L.
F. Chrestenson & Co. price in this
issue.

Tenders for the building of the
proposed new Gleichen covered rink are
called for elsewhere in this issue.

Don't get excited (when the fire
whistle sounds for the practice, but
turn out and show you appreciate the
brigade's efforts.

Monday a heavy rain storm was
felt through Quenestown and Mil-
lerton, but so far Gleichen has had
little rain.

The new Town Office is almost com-
pleted and is now a very neat appear-
ing addition to our main street. The
rest room fits a long felt want.

The first frost of the season was
experienced Monday night and was
quite severe, ice being formed, and
the weather has been quite cold since.

Furniture of the estate of the
estate of Mrs. Lyon will be sold at
Auction by T. H. Beach next Tuesday
Sept. 10, at 2 p.m. See the announce-
ment elsewhere in this issue.

Mr. and Mrs. Jack Moss and fam-
ily returned from their motor trip to
Vancouver and other western points,
having greatly enjoyed their vacation.
They were accompanied by Miss E.
Woods.

Mr. J. E. Waddell, editor of the Al-
berta Farmer, accompanied by his
wife and daughter, returned from Cal-
gary last Thursday to visit Mr. and
Mrs. W. P. Evans, who returned with
them on a trip to Banff.

After sweating in heat at times
reaching 92 degrees, the sudden
change Sunday morning which termi-
nated with fog Monday night was
rather lovely folk.

The Fire Brigade could do no bet-
ter at this time of year than decide
on last night to have a series of
practices to bring the different de-
partments up to efficiency for the
coming winter and efficiency of a num-
ber of prizes is a splendid idea.

We hope our readers will forgive us
for lack of local items this issue
as part of our staff returned to Banff
to see the big Scotch celebration, the
nearly learned some of the language,
but have already lost most of the
burr. Among other notables we saw
was Charlie McKeay, Howard Brown
and Bob Harrison. More might
have been seen but the snow and the
Government vendor made visibility
very poor.

THE PAJAMA FAD

This season's pajama fad among
men, which was given such an im-
petus through street appearances in
nocturnal garb by an editor may be
something more than a passing fad.
We doubt that actual wearing of
night clothes in daytime is likely
to become general, even in torrid
weather but the idea of more sen-
sible clothing for men is one which
seems bound to become more wide-
spread. Already the stiff-boomed shirt,
the starched collar and the barrel
collar, even though the comfortable
suspenders of old have been largely
superseded by the often distressing
belt. Certainly there might be de-
vised a species of male garb which
would at once fulfill the requirement
of neatness combined with comfort.
Whether it shall take the form of
modified and glorified pajamas, or
something entirely different remains
to be seen.

But when it arrives it should be
welcomed by the long suffering ma-
jority tribe—if the members thereof
have enough nerve to wear it.

A great deal of talent is lost to the
world for lack of courage.

"Leading entomologists of the world
estimated that the United States
of the prairie insects, which it is
making a comprehensive study
alone over \$2,000,000,000 annually.

An automatic wireless signal that
will send out at intervals the po-
sition of an airplane and SOS signals
has been invented by an electrician
in France.

T. H. BEACH, Auctioneer.

PRICE CUTTING

Never did anyone any permanent
good.

Is admission the price was too
high.

Is unnecessary if your customers
are getting a fair deal.

Is a poor way to establish pub-
lic confidence in your business.

Is easy to start and hard to stop.

Is inefficiency's last resort.

Is the first step towards a receiver-
ship.

A movement for the wider use of
bath tubs in France reveals a former
custom at the aristocratic girls
school at St. Cyre, founded by Ma-
dame de Maintenon 250 years ago.

The girls had to take "three
great baths" a year, one each in May
June and July—whether they they
needed them or not.

A South Dakota weekly newspaper
has just completed publishing the
Bible in statements, which it began
22 years and eight months ago.

It might begin over, as the contents
of the Book would be of real new
to the many of the present genera-
tion.
